## Editorial

Geological Behavior (GBR) publishes original research across a broad range of subfields in geology, including geophysics, geochemistry, sedimentology, geomorphology, petrology, plate tectonics, volcanology, environmental geology, medical geology, structural geology, mineralogy, and planetary sciences. Many of its articles have wide appeal for geologists, present research of topical relevance, and offer new geological insights through the application of innovative approaches and methods. This journal is devoted to the publication of research papers, short notes or communications, reports and reviews in all fields that are of general relevance to geology and different landscapes formation in the world. Contributions are subject to peer review and editorial control according to SCI guidelines to ensure that the required standard of scientific excellence is maintained.
